

ZeroSpam + Office 365

The combined power of 2 great solutions

INTCOMEX

We take you higher

Since its launch, Office 365 has proven to be a quick and easy way for organizations to migrate their email to the cloud. Using a professional email security solution on top of EOP (Exchange Online Protection) provides an additional layer of protection against today's advanced threats.

The benefits of adding a professional cloud anti-spam to office 365

	Office 365	Office 365 + ZEROSPAM
Protection against hidden executable files used to propagate malware	Good basic protection.	ZeroSpam uses multi-factor analysis that detects executable code hidden in any type of file, zipped or not, even in the name of a fully supported extension has been tampered with. Read about malware propagation at zerospam.ca/bad-exe-file .
Phishing / Spear Phishing / Macro protection	Advanced Threat Protection only available with some subscriptions at an extra cost. Possible issues with recognition of phishing attempts in languages other than English.	Generic and customized spear phishing protection. Special anti-phishing layer specific to banks, social media sites, Paypal and eBay. ZeroSpam gives you full control over whether you want to accept Office files containing macros.
Quarantine Management	Default configuration: creation of individual quarantine accounts for all users, which increases security risks and lowers productivity. Centralized quarantine requires special configuration in the Exchange Administration Center.	While individual quarantines are fully supported, the ZeroSpam solution is based on self-subscription or manual creation of accounts for trusted users as opposed to automatic creation for everyone. This has proven to be safer, more productive and easier to manage for clients and resellers.
Phishing / Spear Phishing / Macro protection	Advanced Threat Protection only available with some subscriptions at an extra cost. Possible issues with recognition of phishing attempts in languages other than English.	Generic and customized spear phishing protection. Special anti-phishing layer specific to banks, social media sites, Paypal and eBay. ZeroSpam gives you full control over whether you want to accept Office files containing macros.
Spam Digests	Daily spam digests must be enabled globally for all Office 365 users.	ZeroSpam enables each user to request an individual spam digest in their profile.
Technical support	It may be difficult at times to obtain quick and detailed answers when troubleshooting False Positive (FP) and False Negative (FN) issues.	ZeroSpam offers agile and responsive technical support. No form required, no call queue. Service is competent, thorough and fast.
Log searches	Message trace reports must be requested and result are delivered upon completion in a csv file. Administrators are unable to determine the outcome of a connection attempt immediately.	Using various criteria, logs can be searched easily in our interface for up to 30 days. The outcome of every connection attempt can be determined easily and immediately.
Continuity	Incoming email is queued for 2 days if the client's server is down.	Fail-safe redundancy ensured by ZeroSpam as a third-party provider. 5 days of free email spooling and proactive notifications in case of server problems.
Spam catch rate	No proven spam catch rate. Unknown level of undetected spam.	ZeroSpam's catch rate is constantly validated by Virus Bulletin, a U.K.-based firm ranking email security vendors. The solution blocks 99.8% of spam on average and blocks a very low number of legitimate emails.
Archiving	Basic search capabilities.	Premium add-on archiving service. Advanced search capabilities. Unlimited storage, forever.
